CDW-G	<p>NO COST VMware Cloud Assessment: Powered by Collective Intelligence, CloudPhysics easy-to-use SaaS solutions provide actionable insights. Immediately pinpoint hidden complexities in the infrastructure, discovers inefficiencies and risks that drain and endanger resources, and enable "what if" analyses that inform every data center decision.</p>	30	<p>See a live demonstration of what a NO COST CDW assessment from CloudPhysics provides you.. Custom analysis of your VMware infrastructure across one or more data centers. Public Cloud cost vs. on premise cost analysis. Identification of immediate cost savings through increased space efficiency (elimination of unneeded snapshots and VMs, greater VM density, etc.) . Examination of all datastores, spanning multiple vCenters, to identify and eliminate risks of capacity-induced disruption . Detailed inventory of your entire population of VMs, servers, and PCI devices, highlighting assets that are obsolete and/or need updating . Reports on configuration and status of key components of your VMware environment, including NTP servers and clients . Benchmarking key parameters against the CloudPhysics community, VMware best practices, and the global Knowledge Base</p>	<p>www.cdwg.com</p>

Sun Management	<p>Sun Management is a Cyber Security, Cloud Data Management and Network Engineering firm specializing in leading edge next generation solutions for the DMZ, Data Security and Core Network Services.</p>	15	<p>Sun Management will demo the Rubrik Enterprise Cloud Data Management solution. Rubrik CDM 4.0 Alta is Next - Generation Data Protection. It is easy to use with Zero Install, Instant RTO and will Scale Forever. The Rubrik CDM 4.0 - Alta simplifies backup and recovery for physical and virtualized environments. It eliminates backup software by integrating data orchestration, catalog management, and deduplicated storage into a plug-and-play appliance. Stop wasting time managing backup jobs, and start automating backup policies. Search for VMs, physical databases and applications, or files just as you search on the web, with suggested search results as you type. Take application-consistent snapshots without lengthy snapshot windows and application time-outs. Test recoveries instantly and provide near-zero RTOs. Mount virtualized applications directly on Rubrik without additional storage provisioning. Automate custom lifecycle management workflows that play well with third party services. Rubrik is an API-first architecture-even its HTML5 interface consumes RESTful API endpoints.</p>
